HOW IT WORKS

Our expertise, coupled with state-of-the-art facilities, guarantees uninterrupted production and exceptional product quality.

Planning and Communication

- Communicate Often And Early
- Establish Expectations And Requirements

Mold Preparation

- Pre-Shipping inspection
- Drain the Lines
- Wrap, Crate and Secure

Mold Transfer and Validation

- Incoming inspection
- Validation Testing
- Production Ready

"innovation and technology... built on a customer first attitude"

INDUSTRIES

CEW, Inc. is a leading provider of custom plastic injection molding solutions for many industries. Our expertise in design, engineering, and manufacturing allows us to create innovative and durable products that meet the specific needs of these demanding markets.

Lawn & Garden and
Outdoor Equipment

Medium/Heavy
Duty Transportation

Wheelchair & Medical
Equipment

E-Bikes and Electric Vehicles

Material Handling
& Residential Rollout Carts

Light Industrial/Custom
Plastic Components

PRECISION, QUALITY, AND VALUE:

EXCELLENCE IN MANUFACTURING SOLUTIONS

- **Large Tonnage Injection Molding:** Our powerful presses handle large and complex parts.
- **Strategic Locations:** Our Baldwin, MS and Reynosa, Mexico facilities offer cost-effective manufacturing and quick turnaround times.
- **Extensive Experience:** Decades of expertise in injection molding.
- **Automation and Cost Efficiency:** Advanced technology and streamlined processes for optimal results.
- **Full-Service Capabilities:** Comprehensive services from design to production.

THE CEW ADVANTAGE

CEW, Inc. specializing in medium to high-volume thermoplastic components. With almost 50 years of experience and ISO 9001:2015 certification, we deliver high-quality, reliable products tailored to your exact specifications.

- **Seamless Transition:** Minimize downtime and maintain production continuity.
- **Improved Efficiency:** Leverage our advanced manufacturing capabilities.
- **Enhanced Quality:** Benefit from our expertise and ISO certification.
- **Cost Savings:** Reduce production costs through optimized processes.
